

Did you know?

80%

Our aim is that by 2020, 80% of our nursing workforce will hold a BSN or higher. In 2014, 59% of our RNs had a BSN or higher.

28%

The percentage of community college students who progressed to the BSN degree upon completing their ADN degree in 2013.

Partnerships

In Hawai'i, our private and public nursing institutions are partnering to create seamless RN to BSN transitions.

215

The total number of graduates from RN to BSN programs across Hawai'i from 2013-2015.

"Emergency medicine is constantly evolving and staying current with the latests evidence-based practice is required to provide the best care possible for my patients. The transition from ADN to BSN gave me the resources and skills necessary to stay current with the latest evidence-based practice."

— Vance Yamamoto, BSN, RN

Hawai'i APIN partners are vested in professional development of local nurses through advancing education. They feel strongly that a well-educated workforce leads to improved quality health care and better patient outcomes.
